Security   Smartcard   Magstripe   Contactless   Rugged   Color Backlit Display

ingenico®

iSelf Series

• Highest Security Levels

PCI-PTS 3.x. certified, the **iSelf** Series meets the highest and latest hardware and software security requirements. The range also complies with SRED and provides flexibility options with open protocol modules.

• All Payment Options

The iUP 250 + iUR 250 enables EMV Chip and PIN, MagStripe transactions on kiosks while respecting security standards and improving customer interactivity. Transactions are simpler, faster and more secure.

• Contactless Acceptance

The **i**UC 150 offers contactless payment, enabling e-wallet and new payment use cases. It also complies with standards such as MasterCard PayPass™, Visa PayWave™ and EMV contactless cards.

• Highly Ruggedized

Thanks to its robust design the **iSelf** Series stands up to the most demanding outdoor environments and a wide variety of adverse environmental conditions. Keypad, card-reader and contactless device components are proofed against vandalism (IK10) and extreme weather.

• Telium 2 Technology

Powered by Ingenico,Telium2 Technology is the result of 30 years' experience in the payment industry. Secure, highly integrated and fast, Telium is the world's best platform to provide payment services, applications and connectivity.

• Easy Integration

Our compact and modular **iSelf** Series devices are embedded in their enclosure and integrated according to EVA* / IMB** market standards. Maintenance requires no additional equipment and updating is done simply with the iUP 250 display and keypad. It is so flexible that interfacing with the entire kiosk system has never been so easy.

• User-friendly

The **iSelf** Series provides a simple and easy-to-use customer interface with brightly colored backlit displays, LEDs and function keys, making their use a pleasureful experience. Transflective technology enables the **iSelf** Series to work in any lighting condition.

• Flexible Communication and Connectivity

The **iSelf** Series provides a wide range of integrated connectivity features to communicate with kiosks and acquirer hosts. It includes USB (slave, master), RS232, MDB (slave, optional master), Ethernet and optional GPRS, covering most kiosk system requirements.

• Eco-friendly

Stand-by mode guarantees optimal energy efficiency. Ingenico is a reference in safeguarding the environment. Our manufacturing facilities are ISO 14001 certified.
